Pregnancy monitoring package MOM TO BE

Out of respect for expectant mothers and with love for the baby that will born, Medpark has created the "Mom to be" pregnancy evidence and monitoring package.

The package enters into force from the 10th to 12th week of pregnancy, at which time any pregnant woman must be registered with an authorized medical institution.

The evidence and monitoring of pregnancy is done by the family doctor and the gynecologist, being performed consultations, investigations and analyzes recommended at each term of the pregnancy, provided by the legislation in force, but also a set of additional investigations, according to international standards.

EVIDENCE OF PREGNANCY AT MEDPARK MEANS:

- » Primary care and supervision of pregnancy during the prenatal period;
- » Issuance and continuous update of the individual file of the pregnant woman (form 111E) and the perinatal card (form 113E) with all the information about evolution of pregnancy and the state of health of the pregnant woman, according to the national standards in force;
- » Issuance of medical and maternity leave certificates;
- » Elaboration and completion of medical documents necessary for the granting of maternity allowance and other benefits guaranteed by the state;
- » 24/7 emergency medical services;
- » Multidisciplinary team of experienced specialists;
- » No queues at medical offices;
- » Tracking the pregnancy schedule for the expectant mother and inviting her to the next stage of monitoring;
- » Educational programs for future parents;
- » Continuity of processes: pregnancy planning, pregnancy monitoring, childbirth, childcare - all in a professional, friendly and comfortable environment.

My baby is:
